

Openserve Web Connect Prepaid & Webstream Prepaid

Affordability, Reliability, Flexibility

Every partner needs a connection

When choosing a prepaid connection for your customer, there are three criteria we believe are the most important:

Affordability

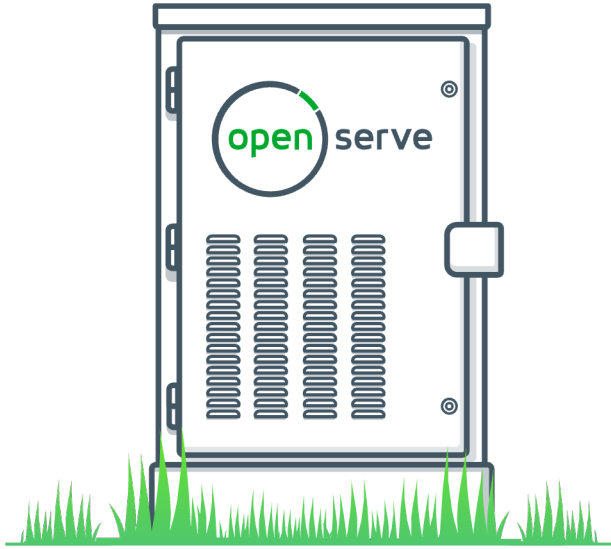

Reliability

Flexibility

As SA's national connectivity leader, Openserve meets these criteria and so much more.

We are committed to delivering innovative services and improving the future of our client's businesses.

Background & Introduction

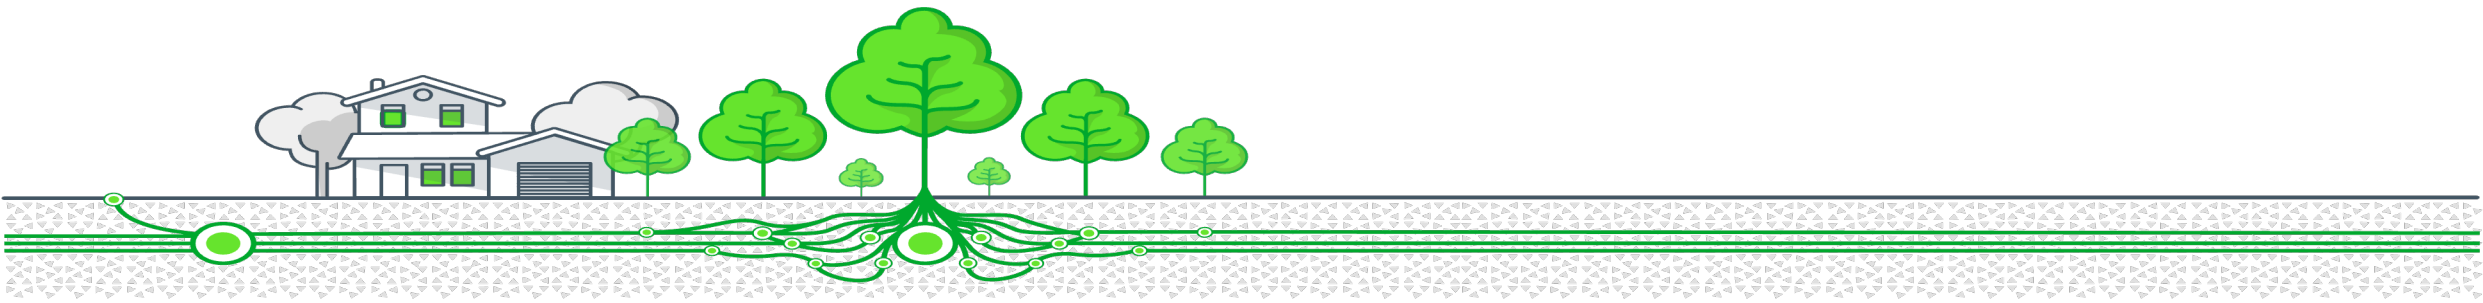

Many small licensed operators find it difficult to venture into ISP business space, due to the lack of technical skills, cost of hiring expert staff and the expense associated with investing in internet-based infrastructure.

The Openserve Prepaid Connect products are positioned at empowering Licensed Operators with an end-to-end product offering that will help stimulate broadband take up.

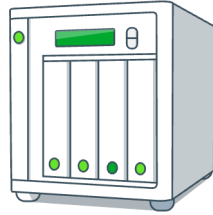

It is further envisaged that the Openserve Prepaid Connect products will stimulate and create opportunities for the creation of multiple channels to the end-customer market segment.

Openserve Web Connect Prepaid (OWCP) will be offered in a selected footprint, to address entrepreneurial development as a part of social investment.

Openserve Webstream Prepaid (OWSP) will be offered nationwide to cater to all segments, targeted at providing an affordable broadband product.

Broadband Ecosystem

End-to-End Fibre Access

- 20/10Mbps for OWCP
- 25/25Mbps for OWSP
- 50/25Mbps for OWSP

Internet

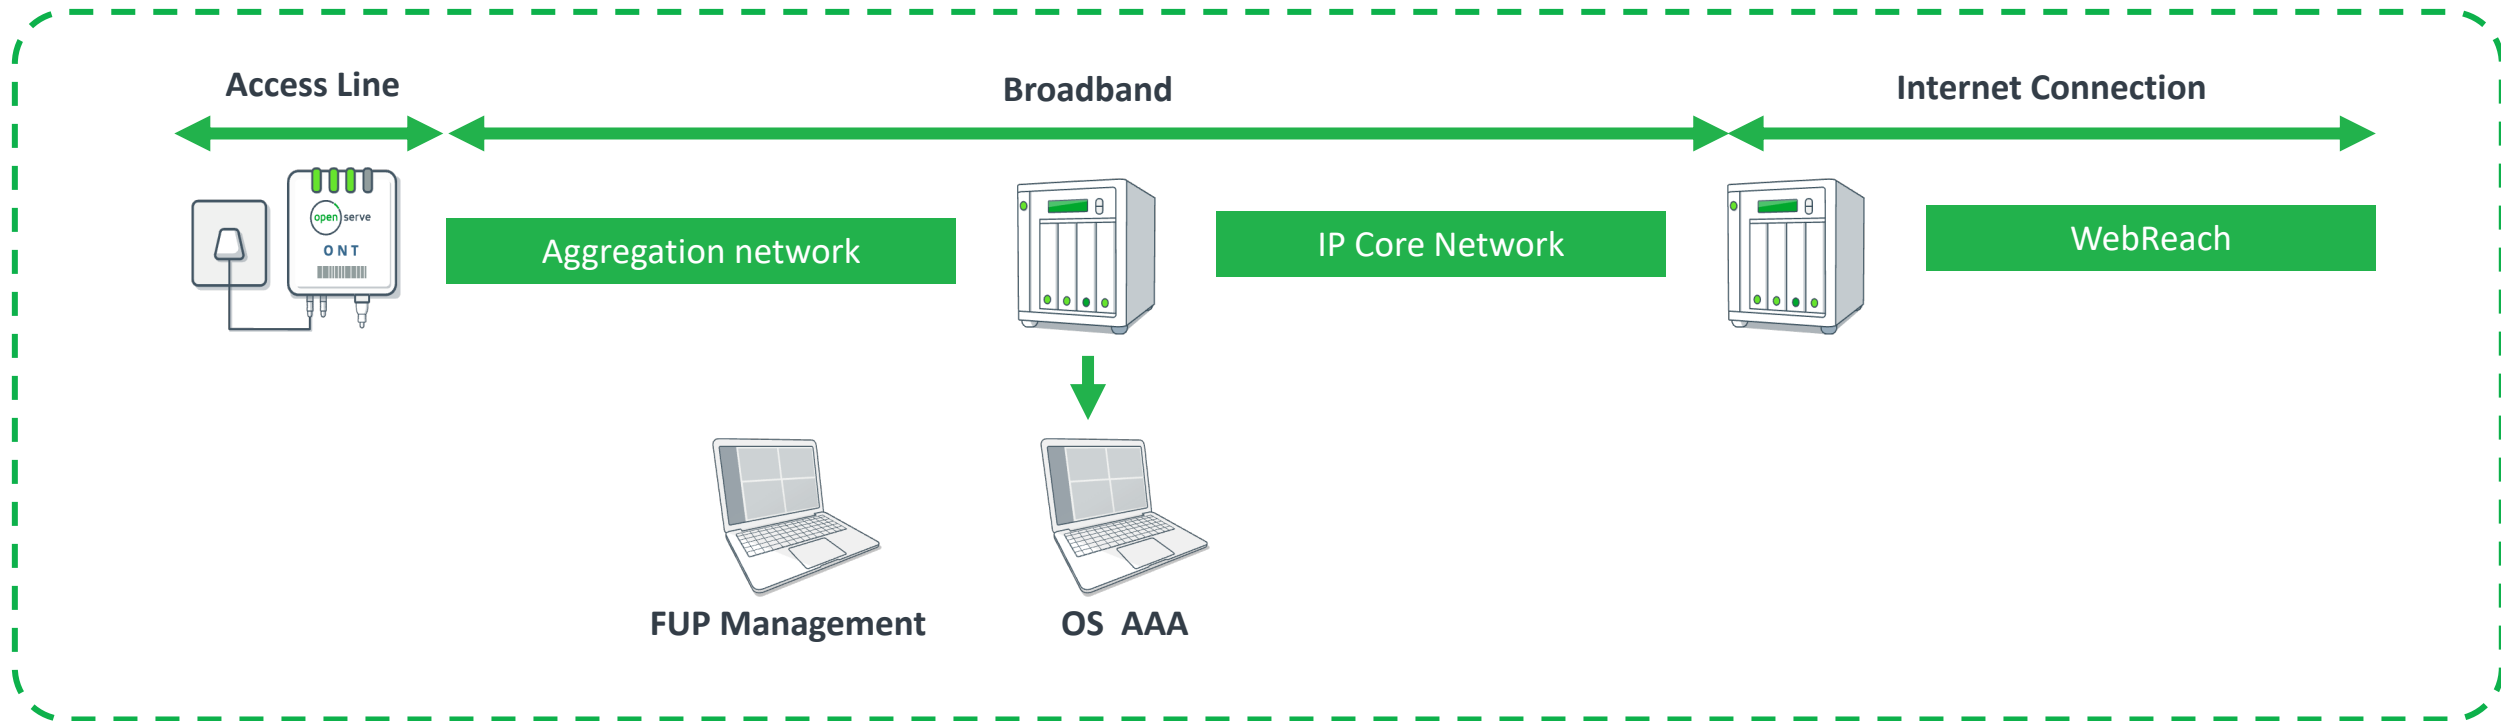

- No need for additional OBC bandwidth purchases.
- Purchase data bundles as you need it.
- The data bundle will be uncapped for the bundle duration (AUP may be enforced).
