

# Openserve Voice Connect

# Service Description

---

Openserve Voice Connect (OVC) is an Over the Top (OTT) SIP VoIP service that requires internet access to operate. Openserve Voice Connect provides end-users with the ability to make and receive calls on their landline numbers wherever they have access to internet connectivity. The service can be consumed on single line IP PBXs, clients, and IP Telephones.

# Key Features

---

Openserve can remotely configure and test the device.

Accommodates existing customer premises equipment.

Can be configured on any internet/broadband access acquired from any approved supplier.

# Customer Benefits

Free on-net minutes

Ability to use existing legacy equipment and thus not incur additional costs

Competitive subscription fee for the SIP session.

OVC can be white-labelled to suit your end customer needs (taking advantage of the zero rated on-net minutes),

Package voice with Openserve fibre rollout initiatives or other broadband services.

Reach new markets.
